

Astro Aluminium specialises in the supply of an extensive range of extruded and rolled aluminium products as mill finish (raw) or surface finished. We also specialise in the manufacture of semi-finished and finished aluminium products on behalf of our customers, or for distribution through our own channel.

### Extruded Products

Our range of extruded aluminium products includes round tube, square tube, round bar, square bar, rectangular tube, angle, channel, flat bar, slat sections and more.

### Rolled Products

Our range of rolled products includes sheet, tread plate, mesh plate and more.

### Fabrication Services

As part of our turnkey offering Astro Aluminium boasts a comprehensive range of equipment for aluminium fabrication, and through our brand Xrossbow, we are an approved P&A (Parts & Accessories) supplier to Nissan South Africa.

#### ISO 9001:2015

Astro Aluminium have implemented and apply a quality management system which is in compliance with the requirements of ISO 9001:2015.

We aim to further improve our well respected "one stop service" by both sourcing the necessary material for your orders and going the extra step of performing fabrication services that may be required.

### Aluminium CNC Bending

We offer CNC bending for aluminium sheet and plate.

### Aluminium CNC Routing

We offer CNC routing in-house (DXF File compatibility) and are suited for high volume, component and extrusion type work. Operations include standard cutting, drilling, counter-sinking as well as stepped cutting.

### Aluminium Cutting

We offer cutting services on aluminium extrusions.

### Aluminium Guillotining

We offer straight guillotining for aluminium sheeting from 0,5mm gauge up until 4,5mm gauge.

### Aluminium Press Work

Our press shop are used for punching, forming, and shaping aluminium extrusions and sheet according to customer specifications.

### Aluminium Drilling

Our drilling services include drilling, counter sinking, and tapping.

### Custom Extrusion Development & Design

Our experienced team are available to assist with the design and development of custom customer extrusion dies. Our in-house CAD software, along with a proven track record, ensure that the complexities involved are safely and efficiently covered.

### Specialised Packaging

Customer specific product packaging is available on request.
